## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18, 20-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the adjusting step for delta W in the claims rejected the inclusion of the term "or", between elements (i) and (ii) is vague, since it is not clear if one of items (i)-(iii) is designated or if items (i) and (ii) are chosen in lieu of item (iii). Clarification of the term "or" is required in the forthcoming response.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 19 is rejected under 35 U.S.C. 102(e) as being anticipated by Smith et al.

Note page 4 in Smith et al denotes calibration of the sensor at steady state, barring further description of just what steady state refers to, since the sensor is calibrated in the absence of gases sensed during use, such calibration leading to an adjustment of power as designated.

### ***Allowable Subject Matter***

Claims 1-18 and 20-22 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record does not set forth the detailed calculation of resistance using formulas (i) –(iii).

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yannopoulos,

Sekido et al and Williams are cited for disclosing pertinent heating control systems of interest.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
